The Stock Market.

NEW YORK, Nov. 18 .- The stock market o-day was somewhat more active than that of yesterday, and displayed decidedly more strength in the forenoon, but the gains cored during that time were generally lost n the weakness developed in Richmond and West Point securities and the consequent checking of the buying power, though no osses of more than small fractions were seen ouslide of Richmond and West Point

The market shows evidence of a very arge short interest both here and in Lonwhile not rapid is more steady and general. The market to-day acted more like a built market than it has for some time, and many stocks reached figures which they have not seen in a long time. Gains extended to Grangers, Coalers and Vanderbilts to 2 per cent, and only Richmond and West Point stocks were sluggish, and when the an-nouncement was made that the failure to secure a quorum had been made, the infernce that a dividend would be passed pre that a dividend would be passed pre-ipitated an attack upon all securities of hat road, and common stock reacted from a to 1%, and preferred from 54% to 48%, hough the latter afterwards recovered o 51.

Coffee Market.

Henry Clews & Co. say: Owing to the reported Brazilian political troubles for the past week, the coffee market has continued each day to advance, with shorts principal buyers, and from appearances there have been purchases made for the investment account, but on a small scale. The volume account, but on a small scale. The volume of business has been extremely light, showing conclusively that the interest in the market is pretty nearly liquidated. The trading appears to be mostly of a local character, the foreign houses doing very little. The advance has been 50 to 60 points, near months being mostly affected in sym-pathy with an active demand for actual coffees, sales having been made as high as concess, sales having been made as lingh as 13½ for spot 7%, a large business having been transacted; and the sales of affeats, near and distant contracts, were placed at 12½ to 13½c. Brazil advices during the week have been quite conflicting, with firm offers ranging from 12c to 13c. Latest advices are that a leading roaster here had been a heavy buyer in Rio, advancing the market several hundred reis, while the advance in price has been offset by the rapid decline in exchange, which officially shows decline in exchange, which officially shows a decline of 114c, but private advices make it 154c lower. Warehouse deliveries show a slight falling off, and aggregate 66,823 bags. The visible supply, 506,980 bags; 1890, 337,291 bags; 1889, 447,885 bags.

CHICAGO, H.L., Nov. 18.—The wheat market did not show that material advance to-day that many traders anticipated and that the weather reports seemed to justify. That it did not is due perhaps more to the nervous feeling of uncertainty that generally prevails as to the probable action of Russia than to the prospective heavy receipts.

The bad condition of the telegraph wires during the early part of the day made it impossible to chain full and secure news from the outside world and as a consequence the market was very inactive for a time. The opening was about the same as yesterday, ruled easy and declined %%%c, then railied %%%c, ruled the same as yesterday to it of lower.

Corn—The market was easier and governed by about the same influences as the day before, in which the weather was the most important. The provision trade was fairly active, but prices went off on heavy hog receipts, which were reported to amount to 8000, and prices went 10c lower.
